## Efficiency powered by the Next-Gen Solution

# iFlight

**iFlight Crew Mobility™** is an easy to integrate Add-On module for iFlight Crew customers. It's a hybrid application with cutting edge HTML5 user interface allowing device or browser independent accessibility. It further facilitates real-time push notifications thereby ensuring crew don't miss any operational alerts while on the move. On top it ensures un compromised data layer security to bestow confidentiality of operational data.

“A platform for improving crew connectivity while ensuring process improvement, operational effectiveness and reduced communication overheads.”
