Empowering Crew for Efficiency and Satisfaction

Next generation digital platform for improving crew connectivity while ensuring process improvement, operational effectiveness, and improving crew quality of life

iflight
CREW

iFlight Crew Mobility™ is an easy to integrate add-on module for iFlight Crew customers. Available on a multitude of devices, including iOS and Android, the application is architected on HTML5 that allows device and browser independent accessibility. It further facilitates real- time push notifications thereby ensuring crew don't miss any operational alerts while on the move. Additionally, it ensures uncompromised data layer security to bestow confidentiality of operational data.

Self Service

Business Process Improvement

Operational Effectiveness

Increase Crew Satisfaction

Reduce communication cost
