Data migration and transformation services for airline operations, cargo, and loyalty management

Data migration is critical to the success of large-scale and mission-critical transformation programs that involve the replacement of core systems and data-intensive applications.
Flawed planning and inadequate attention to details result in failure.

Approach
Do you have a comprehensive migration strategy?

Validations
How will you determine the integrity of migrated data?

People
Do you have the right team to execute the migration?

Accelerators
Have you accounted for the right frameworks, tools, and compliance?

Supplementing, complementing, and augmenting our technology platforms

IBS Software offers data migration services and an expert consulting community to ensure transformation programs meet their intended objectives. We work closely with our customers to develop disruption-free data migration strategies that leverage our deep domain expertise and proven processes. Central to our approach is a robust information management ecosystem with automated accelerators that we apply to the product implementation strategy. Besides mitigating risks, this enables a holistic view of the migration program and simplifies the implementation experience.

100%
schedule adherence

Zero
data quality issues during migration

Hassle-free
implementation through product collaboration

Improved ROI
from single end-to-end supplier

The approach

IBS Software's data migration services provide a mature information management ecosystem with data governance best practices that live on after the project. Data migration services extend the content delivered and the software provided with additional templates, a proven methodology, and a holistic view of how the data migration project fits within the overall systems transformation.

We follow a three-step approach:

Measure — Identify migration impact and gaps and advise on how to manage them.

Build — Define sourcing strategy and create a detailed migration plan.

Execute — Conduct dry-runs to test the go-live strategy and deploy the plan.

Why IBS Software?

As a transformation partner, we offer data migration as a value-added service, with pre-defined business models and consolidation frameworks. The service aligns with customer priorities and has an impeccable track record of fulfilling set timelines, functionalities, and costs.

Highlights:

- Rounded migration strategy to minimize customer dependency.
- Better data accuracy and fewer iterations by working in tandem with our product teams.
- Concurrence in data mapping, facilitated by the co-location of product and migration teams.
- Sound understanding of the customer ecosystem through the data mapping exercise.
- Rich knowledge base of best practices from implementations over two decades.
