Workforce Camp Accommodation

Transform your camp and lodging operations

ilogistics
CAMP

Key Benefits

- Elevated guest experience
- Improved room utilizations
- Automated camp operations
- Personnel safety, health and wellbeing
- POS system and increased revenues

iLogistics Camp module offers powerful features supported by artificial Intelligence and mobile apps to optimize accommodation costs, improve room utilizations and achieve a positive guest experience. Optimize your camp operations with demand planning, bed capacity forecasting, optimization, mobile app based bookings, touchless check-ins, room key management, meals management, digital housekeeping, self-check-in/out and invoicing for owned and contracted facilities.

Demand Planning and Capacity Forecasting:

Consolidate demand from all the customers and forecast future capacity requirements through simulation of demand vs supply to find optimal capacity levels.

Self- Check In and Checkout:

Fast check-in and check-out using QR code/RFID/Smart Badge/Self Check-in Kiosks provides a hassle free guest experience with reduced wait times.

Improved Guest Experience:

Make easy bookings, perform easy room self-check-in and check-out from mobiles & tablets.

Enhanced Room Utilization:

Generate optimal bed assignment plans to improve room utilization across owned and leased facilities. Intuitive dashboards provide real time room utilization data of all camps in the region. iLogistics Suggests the list of available rooms for visitors, considering the traveler's eligibility, gender considerations and room availability.

Point-of-Sale System and Increased Revenues:

Enable sales and digital payments of value adding guest services like in-house restaurants, general stores, bars, spa & cab services.

Digitized House Keeping:

Enable camp managers to track of housekeeping schedules, room maintenance schedules, housekeeping checklists and real time room status updates.

Efficient Camp Operations:

Automated bookings based on crew rotation schedules, automated bed plans for Fly-in Fly- out rotators, automated

passenger confirmations, block booking based on forecasted demand, and self-check-in/check-out through QR Code/RFID/Smart Badge/ kiosks streamline the handling of large guest volumes while offering quick turnaround times.

Improved Safety, Health and Wellbeing:

Ensure high safety, hygiene and security standard through health screening protocols, first time orientation, training compliance, do not return list and gender considerations.

Meal Tracking:

Integrations with Real Time Location Solutions (RTLs), Smart badge and RFID technologies automate meal tracking and improve efficiency with duty of care.

Automated Invoicing and Payments:

Automated invoicing and cost allocation algorithms support easy digital payments and month end chargeback to ERP systems.

Integrated Travel & Accommodation:

Single integrated itinerary for end-to-end travel (commercial/charter/helicopter flights + bus/car) and camp accommodation facilitates effective disruption management during flight cancellations and adverse weather.

Redefining the Future of Travel through Technology Innovation
