Terminal & Shore Base Operations

Optimize your terminal operations

ilogistics
TERMINAL OPS

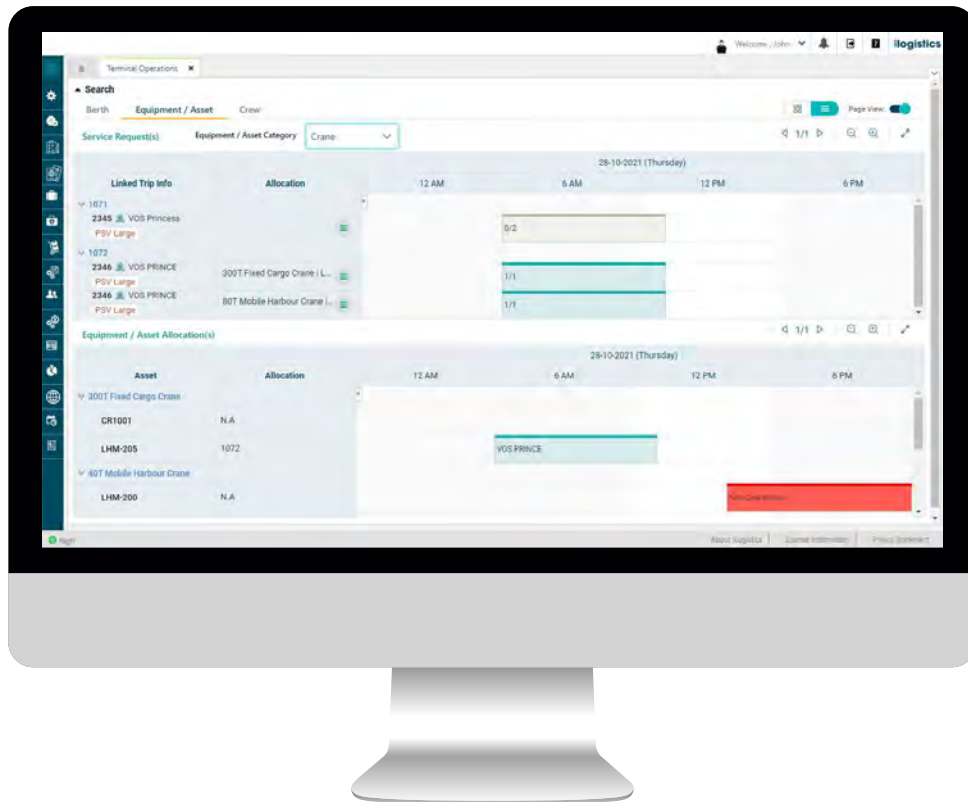

Key Benefits

- Effective tracking of assets
- Improved customer service
- Reduced cost of operations
- Timely rental returns

Maximize the efficiency of shore base services by combining volumes, distance and capacity and achieve operational excellence with safe and environmentally responsible practices. Optimize the terminal operations with integrated forecasting, scheduling and monitoring of logistics services.

Effective Tracking of Assets:

Track rental equipment usage of including cranes, forklifts, generators, man lifts, tractors, vacuum trucks and trailers through effective tracking, Maintain licenses and certificates required to operate equipment. Track expiry of licenses/certificates of equipments and licenses held by personnel to operate the equipments. Assign personnel to operate the equipment based on credentials and medical conditions.

Streamlined Asset Transfer:

Manage and track the movement of assets including approvals and escalation flow for asset transfer requests.

Improved Asset Utilization:

Improve utilization of assets including rental equipments through effective planning, tracking and performance monitoring.

Optimized Shore Base Operations:

Optimize facility planning of berths, yards, quayside & warehouses and improve utilization of assets at supply bases supporting offshore marine material logistics operations.

Streamlined Fixed Base Operations:

iLogistics Fixed Base Operations (FBO) module integrates end to end workforce logistics services for charter airlines and helicopters including baggage handling, departure control, aviation fuel and supplies planning and airport staff allocations (skill set based work allotments).
