

iHospitality GATEWAY

Real-time Access

The **iHospitality Gateway** is the most advanced **multi-channel inventory aggregation platform** serving the distribution side of the global travel market. For travel buyers such as tour operators, OTAs, wholesalers and airlines; the Source Connector provides next-generation connectivity framework which serves as the single source for an exhaustive supply of hotel rooms and destination activities, from a vast array of accommodation and ancillary suppliers.

The platform is **cloud-based** and allows a travel buyer to electronically aggregate content, availability and pricing as well as process confirmed bookings in **real-time**.

With its architecture, the **iHospitality Gateway** can access supply from diverse business models. Its **seamless direct control** feature not only reduces your costs but also substantially increases booking volumes & revenue. It helps you secure and connect the suppliers suited to your strategy. Its real-time inventory sharing ability enables you to get the right inventory at the right price from the right supplier at the right time. Experience state-of-the-art inventory aggregation and unlock your true revenue potential with the **iHospitality Gateway**.

Features

- All content and supply accessed via the Source Connector (a 2-way XML feed)
- Aggregation of direct rates
- Compatible with any software platform
- Real-time inventory and last room availability
- Scalable, high-performing, high-volume
- Unique reservation number from PMS/CRS

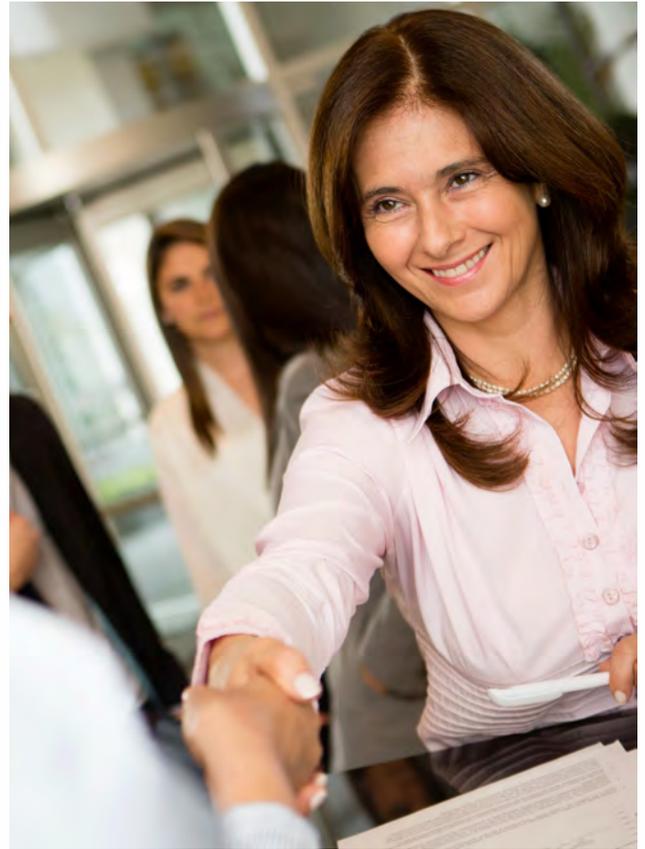

Benefits

- 👍 Dynamic response to demand
