### **IBS wins Information Technology for the Air Cargo Industry Award 2013**

**07 June 2013, Trivandrum:** IBS Software Services, the leading provider of new generation IT solutions to the Travel, Transportation and Logistics industries world-wide, has been awarded the prestigious “Information Technology for the Air Cargo Industry Award 2013”, instituted by UK based Air Cargo Week. In a world-wide online poll, various stake holders of the global aviation industry including airlines, freight forwarders, logistics service providers, airports, GSAs and cargo handling companies cast their vote to select IBS Software, from among several global players, as the winner of the award based on three parameters;

- Understanding the needs of the market
- Making IT easier for the airfreight community
- Innovation and new product development

The award was presented on 05 June at the annual Air Cargo Week award ceremony held at Munich, Germany. In all, 10 awards covering the entire industry were presented to airlines, airports, freight forwarders, cargo handling agents and organizations that have excelled in their journey to being the industry leaders. Air Cargo Week is one of the world’s most widely read weekly magazine carrying news and features about international air freight for the global air cargo industry.

This is the third international award won by iCargo, IBS’ new generation Cargo Management Solution in the last 12 months.
